

COMMERCIAL FIRE PERMIT TYPES

Commercial Fire Permit Type Descriptions

Fire Alarm (C-FALM) – for the installation, modification or removal of new or existing building fire alarm systems.

Fire Alarm – *Electrical Only* (C-ELFA) – electrical permit for the 115v power to most low voltage fire alarm control panels.

Fire Sprinkler (C-FSPK) – for the installation, modification or removal of new or existing fire sprinkler systems in buildings and spray paint booth suppression systems.

Fuel Tanks (C-FTANK) – for installation of underground or above ground fuel storage tanks.

High Pile Combustible (C-FHPC) – for combustible storage exceeding 12-feet in height.

**This permit type does not include the installation of storage racks.*

***Installation of storage racks must be submitted using the Commercial Misc. building permit type.*

Exhaust Hood (C-FHOOD) – for the installation of a Type I Exhaust Hood assembly fire suppression system for use in commercial cooking operations.
